

Agung Prasetyo

Backend Developer

prasetyo.agpr@gmail.com +6285800320277 Sleman, Yogyakarta 55283 <https://portfolio.agprastyo.me/>

Summary

Backend Developer specializing in Go and RESTful API development, with hands-on experience building production-ready systems using PostgreSQL, Redis, Docker, and JWT-based authentication. Comfortable working remotely with self-managed projects and asynchronous collaboration.

Profiles

Github LinkedIn

Projects

POS Kasir

June 2025 – Present

- Designed and developed a production-ready Point of Sale (POS) system backend using Go (Fiber) and PostgreSQL, following clean architecture principles.
- Implemented JWT-based authentication with refresh token rotation, role-based access control (admin & cashier), and secure logout using token invalidation strategy.
- Built RESTful APIs for core POS workflows including product management, categories, orders, payments, discounts, and tax calculations.
- Containerized the application using Docker & Docker Compose, and exposed services securely using Cloudflare Tunnel for production-like deployment.
- Applied API documentation using Swagger/OpenAPI, database migrations, structured logging, and environment-based configuration.

Go Short

May 2025

Independently designed, developed, and deployed a URL shortener, demonstrating full-cycle project management. Implemented secure RESTful APIs with JWT authentication and utilized Docker for streamlined local deployment.

Experience

PT. Solusi Digital Handal

Yogyakarta

Mobile Flutter Developer Intern

February 2024 - May 2024

Collaborated with the design team to translate Figma mockups into functional Flutter widgets. Integrated third-party APIs using the HTTP package and maintained a clean, scalable codebase using the Bloc pattern.

Laris Studio

Sleman, Yogyakarta

Staff Photographer

July 2021 - Now

- Managed client projects from conception to delivery, ensuring clear communication and adherence to deadlines.
- Collaborated effectively with team members to achieve project goals.

Education

Universitas Siber Muhammadiyah

Bachelor's degree • 3.00

Computer Science

Yogyakarta, Indonesia • Mar 2023 - Now

Skills

Backend Development

Go (Golang) • Fiber • REST API Design • JWT Authentication • Role-Based Access Control • Swagger/OpenAPI • Clean Architecture

Databases & Caching

PostgreSQL • Redis • SQL • Data Modeling • Database Migrations

Developer & Collaboration Tools:

Git, Docker, Postman, Firebase, Supabase.

Frontend & Fullstack

Flutter (mobile UI) • React / SvelteKit (dasar) • TypeScript / JavaScript (dasar)

Languages

English

Indonesian
