Profiles

 agpprastyo

 agprastyo

Summary

Self-motivated Backend Developer with a strong foundation in Go, SQL, and building RESTful APIs. Passionate about creating clean, efficient code and experienced in collaborating within agile environments. Eager to contribute to a remote-first engineering team and adept at asynchronous communication and self-managed project execution.

Projects

POS Kasir   June 2025

🔗 https://github.com/agpprastyo/POS-kasir

Developed a Point-of-Sale (POS) system using Go, PostgreSQL, and Docker. Implemented RESTful APIs, user authentication, and integrated payment methods. Designed for scalability and maintainability, supporting real-world retail workflows.

Go, PostgreSQL, Docker, REST API, Authentication

Go Short   May 2025

🔗 https://github.com/agpprastyo/GoShort

Independently designed, developed, and deployed a URL shortener, demonstrating full-cycle project management. Implemented secure RESTful APIs with JWT authentication and utilized Docker for streamlined local deployment.

Experience

PT. SOLUSI DIGITAL HANDAL   February 2024 - May 2024

Mobile Flutter Developer Intern   Yogyakarta

Collaborated with the design team to translate Figma mockups into functional Flutter widgets. Integrated third-party APIs using the HTTP package and maintained a clean, scalable codebase using the Bloc pattern.

Laris Studio   July 2021 - Now

Staff Photographer   Sleman, Yogyakarta

- Managed client projects from conception to delivery, ensuring clear communication and adherence to deadlines.
- Collaborated effectively with team members to achieve project goals.
